Personal

I am a 1991 graduate of Derby High School in Derby, Kansas. I enrolled at the University of Kansas and moved to Lawrence in the fall of 1991. Originally an Architectural Engineering major, I switched to Civil Engineering and graduated in May of 1996 with a Bachelor of Science in Civil Engineering. Tricia and I married in July of 1997 and lived in Tulsa, Oklahoma the first couple of years we were married before moving to Wichita in 1999. We have three sons. Cole just turned 14 (eighth grade), Luke is 11 (sixth grade), and Brett is 10 (fourth grade). I spend time with my family and enjoy watching sports, especially college football and basketball. I also coach youth football and am currently the head coach of a team for boys that are 10 and under.

Professional

After graduating from the University of Kansas, I moved to Tulsa, Oklahoma to work for Hudgins, Thompson, Ball, and Associates (HTB, Inc.) who was then acquired by Dewberry and Davis. I practiced in Tulsa as a civil engineer on a variety of municipal projects. In the fall of 1999, Tricia and I moved to Wichita and I started with MKEC Engineering in the transportation department. I have since spent time practicing in the environmental and general civil departments. MKEC has offices in Wichita, Overland Park, and Oklahoma City. I currently work as a project manager serving industrial clients and am based in Wichita. I am a member of ASCE and KSPE. I am a graduate of the 2008 ACEC Emerging Leaders Program.
