## EXPERIENCE:

I graduated from Kansas State University in 2001 with a Bachelors Degree in Architectural Engineering. While attending school I interned with Orazem & Scalora Engineering and after graduation I became a full time employee as a Staff Engineer. I received my Professional Engineering License and LEED AP in 2008. My current duties include project management and the design of mechanical electrical and plumbing systems. As a project manager I am responsible for coordination between staff engineers and managing drafting resources. While I've worked on a wide variety of projects my workload primarily consists of LEED projects, geothermal heat pump systems, building controls and aviation lighting. I am a member of the following professional organizations: Illuminating Engineering Society, National Society of Professional Engineers, and Kansas Engineering Society.

## PERSONAL:

I was born and raised in Neodesha, Kansas and currently live in Wamego, Kansas. I have been happily married for five years to my wife Kirsten. We have three wonderful children Jace, Shiann and Jovi. Jace is currently serving in the Air Force, Shiann will be a Junior in High School next year, and Jovi is keeping my wife busy just being her two-year old self. Besides my family my biggest enjoyment and frustration is playing golf. I also enjoy hunting, basketball, and home improvement projects. Friends and family are a large part of our lives and we travel regularly around the Kansas area to spend time with and enjoy their company. I am looking forward to meeting and making new friends and business contacts through this program.
