I grew up on a farm outside of the small rural community of Grinnell in northwest Kansas. I attended Kansas State University and graduated with a B.S. in Civil Engineering in December 2006. I then went to work for Kirkham, Michael & Associates in Ellsworth, KS. Earlier this year I passed the PE exam and am a licensed professional engineer in Kansas. I am currently a project manager and design engineer in the transportation department. I have had the opportunity to work on a variety of projects at Kirkham Michael including bridge reconstruction and rehabilitation, bridge inspection and load rating, urban street reconstruction, highway design, and rural road construction projects.

I have been married for four years to my wife, Camille, whom I met at K-State. We have a daughter, Lakyn, who had her 1st birthday in May. We have also recently added a Brittany Spaniel, Rusty, to our family. Between Lakyn and Rusty we are always on our feet chasing one of them. I enjoy a variety of outdoor activities including hunting, fishing, camping, waterskiing and wakeboarding, and golfing. I also enjoy playing no limit texas hold-em poker and several other card games. I am an avid K-State fan and enjoy tailgating before home football games.
