Professional:

I graduated from the University of Kansas in 1997 with a B.S. in Civil Engineering and in 1998 with a M.S. in Civil/Structural Engineering. Upon graduation I joined HNTB Corporation in Overland Park as a bridge engineer working primarily on local and regional DOT projects. My current role with the company is in the capacity of Bridge Department Manager in the Overland Park office where I manage a group of ten bridge engineers and technicians. I am a licensed Professional Engineer in Kansas and Missouri. Over my thirteen year career, I've had the opportunity to work on several Kansas City area highway and road reconstruction projects.

Personal:

My wife Debbie and I married in 1997 and live west of Kansas City in my hometown of Shawnee, Kansas. We have two sons, Chris at age 11 and Nathan at age 9. They are polar opposites. Nathan loves sports and is an avid baseball player while Chris shuns the sports in favor of home repair and remodeling. Needless to say, I have plenty of help around the house for home maintenance. Outside of family and friends, my personal hobbies include woodworking, metalworking, and model railroading, all of which I endeavor to find time for.
