My name is Waldo Margheim and I grew up in Western Kansas. I have a Civil Engineering BS degree from Kansas State University and an Environmental Engineering MS degree from the University of Tennessee (Knoxville). I spent the first six years of my career working for Greeley and Hansen in South Bend, Indiana. Six years ago, I decided it was time to return to Kansas and have worked for GBA (George Butler Associates) since that time. I am an associate at GBA in the Water Environment Group focusing on sanitary sewer design and rehabilitation. I am the current Government Affairs Committee chair for the Missouri Water Environment Association and am a contributing chapter author of the latest update to the Water Environment Federation Manual of Practice No. 17 – Prevention and Control of Sewer System Overflows.

I live in Olathe with my wife (Kelly), two children (Xander – 8 and Ella – 7), and golden retriever (Zoe – 11). I enjoy activities with my children, KSU and UT sports, Guitar Hero, music (I'm a member of the KISS Army), and movies.
