Nathan Pera is a Registered Professional Engineer and Roadway Team Leader with TranSystems, a Transportation Consulting firm located in Kansas City. In his 13 years with TranSystems Nathan has been involved in the design of municipal roadways, rural highways, urban freeways, bicycle/pedestrian paths, and has experience with design build projects.

Nathan graduated from Valparaiso University with a Bachelor of Science in Civil Engineering degree and also holds a Masters of Civil Engineering degree from the University of Kansas.

Currently residing in Overland Park, Nathan has roots in North Central Kansas (Clay Center) where he was raised and his parents still reside. Nathan has been married to his wife, Michelle, for almost 10 years. At home they have two 1 year old boys, Elias and Isaac, to keep them busy. Interests that have been neglected lately include playing basketball and mountain biking. Nathan still finds some time to play the guitar, a skill he is quite mediocre at but one which the twins seem to appreciate.
