I began working for Baughman Company in the spring of 1995, and continued to work summers and after school throughout high school and college. After graduating from the University of Kansas I began working full time for Baughman and continued to design capital improvement projects. After obtaining my PE and PTOE I began to broaden my work to include traffic engineering services, and have continued to grow that department in recent years.

I live with my wife Brooke, and son Eli (6) in Haysville, just south of Wichita. I am very active in the community, serving as chairman of the Haysville Planning Commission, and as a member of the Wichita Wagonmasters. We enjoy playing sports, traveling, and spending time together with friends and family.
