Susan (Susie) McCart is a Senior Project Manager with SCS Aquaterra in Overland Park, Kansas, with almost 20 years of experience in the environmental consulting industry. Susie graduated from the University of Missouri – Rolla with a degree in Geological Engineering, and is a registered professional engineer in Kansas and Missouri and a licensed geologist in Kansas. Susie is currently the Contract Administrator for four environmental services state contracts; three for the State of Kansas and one for the State of Missouri. Additionally, she is the primary client manager for several petroleum industrial companies and solid waste facilities. Susie has served as project manager for remediation and solid waste projects at sites ranging from former and active gasoline facilities, active and closed landfill facilities, bulk terminal stations, and process plants. Her technical specialties include soil and groundwater remedial field investigations, feasibility studies, risk assessments, remedial design and implementation, remedial system operation, maintenance, and modifications/re-design, construction quality assurance (CQA) certification, landfill alternative cover closure design, and landfill permitting. Susie has excellent project management skills, with a high attention to detail and organization, and has developed many trusted professional relationships with clients and regulators. She has worked on a variety of projects in Kansas, Missouri, Iowa, Nebraska, and Oklahoma.

Susie resides in Overland Park, Kansas with her husband, three sons, ages 4, 7, and 14, and one, 100-pound german shepherd (also a boy). She has lived in the Kansas City metropolitan area almost her entire life and appreciates the Midwest seasons. She enjoys watching sports (her kids' events as well as KC Chiefs football), outdoors, baking, and movies.
