I received my BS in Civil Engineering at Kansas State University and a Masters in Civil Engineering at the University of Kansas. I am a registered Professional Engineer in Missouri and Kansas with 12 years of project experience in transportation planning and design including roadway project management experience in both large scale DOT projects and municipal projects. I am currently employed with HDR in the roadway section and located in their Kansas City office on the Plaza. I am very active with the Missouri Society of Professional Engineers and currently serving as treasurer of their Western Chapter transitioning to President Elect in 2014-2015.

I am married with one baby boy born in the Spring of 2014. We are soon to be former Royals and Chiefs season ticket holders, but still cheer them on from our living room. If I'm not watching sports, I'm playing golf or softball and am anxiously awaiting my son's first steps so I can teach him about the great American sports of football and baseball and tell him exaggerated stories of my past athletic accomplishments. I also enjoy SCUBA diving, lake trips, and a nice glass of Cabernet from California.
