

**Lee Baer, EI**

Traffic Engineer

College: **University of Kansas**

Firm: **Affinis Corp**

After graduating from Kansas in 2011, I started my career at George Butler Associates and made the move to Affinis Corp in January 2015. I have had the opportunity to design a number of different pieces of traffic engineering: Temporary Traffic Control, Pavement Marking, Signing, and Lighting among various other things. I had the opportunity to be the signing design lead on the Johnson County Gateway Project and was lucky enough to design the largest sign in Kansas (not up yet).

I grew up in Archie, Mo and graduated in 2005. I went to Fort Scott Community College and later went to KU. Most of my family is from Ohio and I was raised and still remain a buckeye fan, even though I went to KU. I have a little boy, Landon, that I share a July birthday with and I currently have another boy who is due to show up in mid-July. I have been married since September of 2010 and enjoy cars and golf.
