I am originally from Sioux Falls, South Dakota. As I grew up I had an interest computers, which over time (and my father's refusal to buy me a new computer) became a passion of mine. I knew from a very early age that I wanted to be an engineer. After high school, I attended South Dakota State University and in 2001 I graduated with a Bachelor of Science in Electrical Engineering. After college, my wife and I moved to Phoenix where I started my career as an engineer at TMAD engineers. A few years after working at TMAD an old college friend convinced me to move to DLR Group. I have been working at DLR Group for the past 9 years and have had the pleasure of working on a wide variety of projects ranging from K12 educational facilities, correctional facilities (courthouses, jails, etc.), and renewable energy projects. I have recently gained recognition for my renewable energy work at high profile sports complexes and have become an important component to DLR Group's energy services sector.

My wife Jessica and I have been married for 11 yrs and together we have two wonderful children: Abby (8) & Logan (5). My hobbies are primarily centered around our 2 kids which currently involve many sporting events. Personally I have a love of NFL football and play fantasy football with my work colleagues.
