William (Bill) J. Naeger, P.E.
Vice-President/Senior Project Manager

B.S. Architectural Engineer, 1984
Kansas State University

My professional experience is in mechanical, electrical and plumbing engineering projects including telecommunications, health care, correctional, educational, institutional, municipal, utilities, theatrical, office, and multiple residence facilities; with extensive experience performing evaluations and recommendations for existing building systems and analyzing energy use. I currently manage the MEP design group at Bartlett & West. My emphasis has been on projects in existing facilities with demanding restrictions such as limited down time, very restrictive time schedules or other limitations.

My wife, Cynthia, and I have been married 30 years. We are just starting our experience as “empty-nesters”. Our children include: Hannah (25), currently in dental school; Grace (23) preparing to start her doctorate in French; and Will (21) studying political science and international studies. I enjoy historical buildings, antique furniture, home projects, traveling with family and volunteering with the youth group at our church. I have had the opportunity to travel to France, Germany, Austria and China in the last couple of years and have greatly enjoyed experiencing other cultures.
