As managing director, Howard leads SKW's infrastructure services team for planning, construction observation, transportation and structural engineering in the Kansas City metro area and branch offices in Missouri and Oklahoma. He is responsible for strategic planning, project design, quality control, staff development, utilization of resources and business development. Previous to working for SKW, Howard served in the Kansas Department of Transportation for 16 years as both a roadway designer and operations manager. While working at KDOT, he earned his Ph.D. from the University of Kansas where he spent more than a dozen semesters teaching as a teaching assistant or lecturer. Howard's primary area of research is in highway safety and he serves on several national committees including the NCHRP panel overseeing the development of the 2nd edition of the Highway Safety Manual.

Howard lives in Lawrence, Kansas with his wife, Emily and two children Duncan (3) and Margot (6). His favorite activity outside of work is spending time biking, reading, building, swimming and exploring with his family. Playing volleyball and building structures are other activities Howard enjoys doing. He was on the reigning Sunflower State Games Men's Volleyball Championship team, as they have not had that event in the five years since they won. When not enjoying the many wonderful opportunities in Kansas, Howard and family love to travel. He has been to all 48 contiguous states and has his eyes set on getting to Alaska and Hawaii soon.
