Bachelor of Science/ Civil Engineering
University of Kansas / 1997

Registrations

Professional Engineer
Kansas / 2001

Experience

Mr. Morrissey began his career in 1997 as a Survey Technician and Engineer-in-Training and Peterson Freund Associates Architectural and Engineering, LLC, while working towards his P.E. license. In 2000, he was hired by VanDoren, Hazard & Stallings in Topeka, and completed his P.E. in 2001. VanDoren, Hazard & Stallings was then acquired by Poe and Associates in 2002.

Michael worked as a lead designer for Poe and Associates for over 8 years. During this time, he completed several designs for the City of Topeka Engineering Division, KDOT, and several developers.

In 2009, the City of Topeka voted in favor of the City-Wide Half-Cent Sales Tax, which would begin providing revenue in January of 2010. The new workload that the sales tax would bring, on a project management level, led the City to hire Michael as a Project Manager to avoid overloading the existing staff with the additional 12 projects per year. Michael managed the Half-Cent program for three years before being hired at Cook, Flatt & Strobel Engineers as a Project Manager in 2012, where he is currently employed. At CFSE, he manages Road and Development projects, and became an Associate in 2015.
