Mark manages the Vertical MEP design group for Wilson & Company in Salina, KS. He is responsible for business development, quality control and management of operations for this design group. He is a graduate of Kansas State University with a degree in Architectural Engineering. Mark has 26 years of experience in mechanical and electrical building design and is responsible for the mechanical systems design and specification, construction administration, and general administration of MEP facilities projects. He has worked on a wide variety of projects including military facilities, industrial and rail operations, Federal and State facilities, office buildings, medical clinics, educational facilities, restaurants, dormitories, and large residential facilities. His design experience includes HVAC systems, process piping and plumbing systems, temperature controls, industrial ventilation, fire protection systems, lighting systems, power systems and fire alarm systems. As a LEED Accredited Professional, he is experienced with energy related processes and evaluations. Mark is also a Building Systems Commissioning process provider and is licensed in ten states including Kansas and Missouri. Mark is married with two high school aged kids. He likes to follow all local sporting events and is a big K-State and Chiefs football fan.
