1. Brief History: I grew up in Troy, MO which is a small town about 1 hour north of St. Louis. I graduated from college at the Missouri University of Science & Technology (named the University of MO - Rolla at the time) with my bachelor's degree in civil engineering (structural emphasis) and a minor in history. After college I worked for about 4 years at Coreslab Structures in KC designing precast/pre-stressed concrete. After that I started my current job at Black & Veatch in the Telecom division where I am an engineering manager for a group of engineers that analyzes cell phone towers. I got my PE license and I am currently licensed in 6 states (DE, KS, ME, NC, NJ, NY). I am currently married and we have 2 boys (Noah – 4 yrs. old, Nikhil – 1 yr. old).
2. Fun Fact about me: I have a minor in history.
3. Favorite Quote:
Striker: Surely you can't be serious.
Rumack: I am serious...and don't call me Shirley. Airplane!, 1980
4. My job would be a lot easier if carriers and tower owners kept better records of their physical assets and equipment installations.
