A native of central Iowa, I spent two years in northern Minnesota before earning a civil engineering degree from Iowa State University. After graduation, the Kansas City market was hiring and I took a position as a traffic engineer with George Butler Associates.

My wife and I later started our family in Shawnee and I took a position as the City of Shawnee Traffic Engineer. I thoroughly enjoyed 15 years of municipal service where I was involved in nearly every facet of the City's Public Works Department. Shawnee's population grew by over 30% during my tenure, and Mindy and I began the joys of raising two sons. There have been lots of soccer, baseball, and basketball games.

In 2015, I longed for a new challenge and accepted a position with BHC Rhodes. I now work as a part of their talented Public Works team. I am fortunate to work with a group of people I really enjoy and who want to make a difference.

Fun fact:

Played a season of college volleyball at Bemidji State University.

Quote:

"Therefore do not worry about tomorrow, for tomorrow will worry about itself." Matthew 6:34

My job would:

My job would be a lot easier if... I had less experience
