

Greg serves as a member of MKEC's Executive Management group and is responsible for ensuring that all civil engineering teams have the resources necessary to meet our client commitments and provide quality engineering solutions. As principal and project manager, Greg also provides specific direction and design solutions for projects. He has significant project experience related to drainage and the associated permitting process, municipal utilities and roadways, land development and the land entitlement process. Greg joined MKEC upon graduation and has spent his professional career providing engineering design and management on numerous projects.
