Bio

I graduated from Kansas State University with a degree in Architectural Engineering in 2008. Out of college I worked for a company in Topeka for roughly 2 years before moving back to the Manhattan area and starting my career at Orazem & Scalora Engineering. I received my Professional Engineering license in 2013, and in 2018 I became a principal at my firm. Orazem & Scalora Engineering preforms Mechanical, Electrical, and Plumbing engineering consulting services. Our project portfolio is broad, ranging from K-12 Education, Higher Education, Laboratory, Housing, Industrial, Recreation, and City/County. Most of our projects are in the state of Kansas.

I have been married to my wife Abby for 10 years. She is also KSU graduate and is a reading teacher for the USD 320 Wamego Public School in Wamego, where we live. We have a daughter, Lucy who is 6 years old. She enjoys music and theater and hopes to be a pastry chef one day.

Fun fact about you that will be surprising/interesting to your classmates!

In my free time I enjoy hunting, fishing, and smoking meats. My favorite place to fish is outside of a small town on Colorado where I get to fly fish above 10,000 ft on a snowmelt-fed stream.

Favorite quote

“It is hard to fail, but it is worse never to have tried to succeed.” – Theodore Roosevelt

My job would be a lot easier if

if all clients and owners could maintain the schedules they provide to us at the beginning of a project.
