Bio

I graduated from Kansas State University in December of 2009 with a Bachelor of Science in Civil Engineering. After a few engineering career moves, I landed at MKEC Engineering, Inc. in April 2013.

Predominately, I work as a project manager and design engineer in MKEC's City/County Services Department. We provide a wide range of services to smaller communities/counties/townships who have limited or no engineering staff. These projects vary from annual street maintenance programs, to utility expansions, up to new water and wastewater treatment plants. I'm also involved in Land Development and Industrial Projects.

I live in Park City, KS with my wife, Katie, and 16-month-old daughter, Peyton. As a family, we spend as much time as possible hunting, fishing, hiking, and watching sports (especially K-State football and basketball).

Fun fact about you that will be surprising/interesting to your classmates!

I have been waist deep (with chest waders) in both feed yard and hog farm lagoons. I spent three plus years with KLA Environmental Services, Inc. in Scott City, Kansas. One of my tasks during the fall and winter months was to install whole pond seepage testing equipment in lagoons.

Favorite quote

In three words I can sum up everything I've learned about life: it goes on. – Robert Frost

My job would be a lot easier if

our clients had larger project budgets.
