Bio

A native Kansan, I was born and raised in the Morris County town of White City, population approximately 550, where my parents owned and operated the lumber yard/hardware store. I have two Bachelor of Science degrees from Kansas State University: a B.S. in geophysics and a B.S. in civil engineering. I have been in the consulting engineering business for 32 years, thus it's somewhat difficult to consider myself an "emerging leader". Ha! I have been with SMH Consultants since March 2009 and I have 3 grown children – two sons and a daughter.

Fun fact about you that will be surprising/interesting to your classmates!

have played drums in dance bands regularly since 1982 and played my first "gig" while in high school in 1979.
