I graduated in 1999 with a B.S. in Architectural Engineering from Kansas State University. During my time at KSU, I was a member of the lacrosse team, mountain bike team and road bike team. Upon graduation I moved to Lawrence, where I currently reside with my wife Jenn and our children Brendan, Lillian and Ryan. Although a loyal K-Stater, I was given the opportunity to coach for the University of Kansas men's lacrosse team from 2002 until 2007.

After a summer and fall internship and subsequent to graduation in 1999, I was employed full time at Latimer, Sommers and have enjoyed my work here ever since. In 2008, I was given the opportunity to advance my career with Latimer, Sommers by becoming a partner with the firm. During my career at Latimer, Sommers I have been given the opportunity to work on a multitude of projects. In recent years I have performed work in correctional facilities, industrial facilities, educational facilities, retail, office space, and others. My current involvement in projects includes all aspects of design and construction administration responsibilities.
