Hi, my name is Dan Holloway, and I grew up on a farm near the small town of Woodston, KS. I graduated from Stockton High School in 1988 and went to Washburn University to play football for 4 years. After the desire to play football was “pounded” out of me, I went to the University of Kansas for 2 years. I obtained a BS degree in Physics from Washburn University and a BS degree in Civil Engineering from the University of Kansas in May, 1994. I also started full time with Cook, Flatt & Strobel Engineers, P.A. (CFS) in Topeka that same month. I am currently an associate in the municipal/land development division of CFS. I manage and design projects for street improvements, storm water conveyance/detention, water distribution, sewer collection, and land development. These projects are for municipalities, counties, government agencies, and developers.

Life outside of work centers around my family: My beautiful wife Di of 17 years and my children – Abby, Anna, Allison, Adriel, Amy, and Caleb - ages 13 years to 4 months. Yes, 5 girls and 1 boy. In my “free” time, I enjoy coaching (and watching) basketball and soccer for my girls’ teams, doing home improvement projects, and spending time with my family. In my other free time (which I had 13 years ago) I enjoy sports, golfing, hunting, fishing, photography, and the outdoors in general. I am looking forward to meeting everyone.
