My name is Jeff Lackey and I am currently a team leader, project manager and professional engineer in TranSystems' Wichita Office. Following in my father and uncle's footsteps, I graduated from Kansas State University in 2000 with a B.S. in Civil Engineering. Upon graduation, I worked for Professional Engineering Consultants for 18 months before moving to TranSystems in December of 2001. In my 10 years of private practice, I have designed and managed a wide range of projects from minor street and drainage projects to highway, freeway and interchange projects. I am also a supervisor to a team of ten individuals who are professional engineers, intern engineers, construction managers and inspectors. Outside of the office, I am a member of ASCE, ACEC and KSPE. I have served on the board of the Wichita chapter of KSPE, serving time in all board positions and I currently sit on the Executive Committee of WSPE.

I was born and raised in Wichita and currently reside in Conway Springs with my wife Michelle and my 13 year old son Tate. While I bleed K-State purple, my wife's family is from Nebraska so she is a huge Nebraska football fan which makes football season in our house fairly interesting!!!! Fortunately, I have converted her to a K-State basketball fan but the football conversion is going to take quite a bit of time I'm afraid. My other hobbies include tailgating at K-State football games, following K-State sporting events, running/working out, attending my son's sporting events and golf.
