I am a 1993 graduate of Washington State University with a B.S. in Civil Engineering. I began my engineering career with the Washington State DOT in the summer of 1992 and spent portions of the next three years on a 45 mile, \$125 million highway upgrade in rural Washington, starting first in the office assisting with preliminary design, working in the field as a survey crew member, and finally inspecting various portions of the construction. I began practicing engineering in the Wichita area in September of 1994 with HWS Consulting Group.

I began working for Ruggles & Bohm in December 1995. I was involved in the design of arterial and residential streets, storm and sanitary sewer sizing and design, water main extensions, and stormwater detention facility design. I made a brief excursion back to Washington in April 2000 where I learned about storm water quality treatment design along with working on commercial site development. With the quiet (or not so quiet) urging of my wife, I returned to Ruggles & Bohm in February 2001.

I've had the pleasure of working with a variety of communities, having done work for the cities of Wichita, Derby, Park City, Maize, Newton, Rose Hill, Clearwater, Ogden, Manhattan, Hesston and Andover. I've volunteered with the Boy Scouts of America and currently serve on the Economic Advisory Board for the city of Bel Aire. I also volunteer on various advisory boards for Project Lead the Way and serve on the state Board of Directors for the Kansas Society of Professional Engineers. My wife Kerri is very patient with me and my hobbies. As for those hobbies, I enjoy sports, playing video games, running and shooting rifles. I have an 11 year old son and a 7 year old

daughter, both of which are great kids that make their parents proud. It is both a source of pride and shame that my son can beat me soundly when we go head to head in most video games. I'm a diehard Coug and have watched them play at over a dozen different stadiums and arenas since graduation and hope to eventually see them play in every Pac-10 venue.
