I graduated from Kansas State University in 2004 with a Bachelor's degree in civil engineering. Following college, I moved to Kansas City and worked there for six years. My experiences include highway design, stormwater modeling, and field construction engineering services. I recently moved back to the Wichita area to join Allied Environmental Consultants as a project engineer. I look forward to expanding my career with this new opportunity at Allied! Also, I am currently pursuing a Master's degree in civil engineering through the University of Missouri – Kansas City.

My wife, Amanda, and I have been married for six years. We always have some home project that we are working on. When we aren't working on a home project, we like to read, watch movies, or take a leisurely stroll around the neighborhood. We are both avid K-State Wildcat fans, and you can find us cheering on the Cats whenever they are playing. In addition, I enjoy sports, both playing and watching and also enjoy woodworking projects.
