My name is John Ruckman, and I attended the University of Kansas graduating in 1994. I earned a BS in Civil Engineering and a BS in Business Administration. I began work full time with Bartlett & West, Inc. in the Topeka office in May of 1994. I began my career working in the land development department and quickly transferred into the Rural and Regional Water Division where today I act as the local division manager. I am primarily involved in water treatment, storage, and transmission projects for municipalities and rural water systems.

I was born in Lansing, Michigan and currently live in Lawrence, Kansas with my wife Heather and my four children Carter(12), Collin(11), Camden(9), and Cortlyn (6). In my free time I enjoy playing catch outback with the kids, finishing our basement, and camping when it's not quite so hot.
