I attended the University of Nevada Reno and earned a BS in Civil Engineering in 1993 and MS in Civil Engineering (Pavements and Materials) in 1995. I have worked for Terracon since 1995, starting as Project Manager and now serving in the role as Principal and Department Manager of Construction Materials Engineering and Testing for Terracon's Kansas City offices. I enjoy working on pavement failure analyses and forensics and enjoy working with various trades on construction projects.

In my free time, I enjoy family time with my wife of 13 years, Diane, and 9-year old son Ryan. I also enjoy outdoor activities including archery, hunting, fishing and camping.
